

When it comes to candles, we are very picky! We demand quality and so do our customers. Our fragrances are very clean and authentic - not soapy or harsh like so many on the market. Similarly, our candles are clean burning, highly scented with solid color and fragrance throughout.

We have taken some of our most popular fragrances and colors, put them into some of our most popular sizes and made them available to you. These candles are attractively packaged and make perfect gifts.

Each product is available in a choice of six fragrances:
